Gigafactories, artificial intelligence and nano technologies are leading the charge for a step change in cell performance and more sustainable manufacturing.

ON ANOTHER SCALE
Battery manufacturers are spending billions to build high-tech gigafactories to produce batteries at a mass level.

ARE YOU READY TO RACE?
Electrification is transforming motorsport with new race series arriving on the circuit for 2021 – we find out the tech behind each.

MAKING HISTORY
How the Voxan Wattman was engineered to become the world’s fastest electric motorcycle.

THE FUTURE OF BATTERIES
Gigafactories, artificial intelligence and nano technologies are leading the charge for a step change in cell performance and more sustainable manufacturing.

PAY IT FORWARD
Why vehicle-to-grid infrastructure is the smart solution to support utilities for the drastic impact of electrification.

GREASE THE WHEELS
Faced with changing times, oil companies are tapping into new opportunities with specially-developed lubricants for e-motors.

THE FUTURE OF LITHIUM-ION
Multi-million dollar research projects are discovering ways to revolutionize battery performance and production.

WHAT’S NEXT
As the automotive industry works towards its net zero carbon emissions target in 2040, electrification is gathering pace worldwide.

ULTRACAPACITORS
Could this breakthrough technology be set to replace batteries and unlock new performance potential for EVs?

CONVERSION THERAPY
Transforming classic cars to run on modern electric power is becoming big business. We find out how it’s done.

WHAT’S NEXT
As the automotive industry seeks answers on how to recover from its biggest ever crisis, electrification could come to the rescue and usher in a defining era for alternative-energy transportation.

25 YEARS OF EV
Leading figures share their thoughts on how the electric vehicle landscape has evolved and what the future holds.

ULTRACAPACITORS
Could this breakthrough technology be set to replace batteries and unlock new performance potential for EVs?

CONVERSION THERAPY
Transforming classic cars to run on modern electric power is becoming big business. We find out how it’s done.
First published in 1995, and now sent free of charge three times a year to over 20,000* key specifiers and decision-makers throughout the global automotive industry, Electric & Hybrid Vehicle Technology International is firmly established as the world’s leading international showcase for technology and innovation in electric, hybrid and fuel-cell vehicle design, development and manufacture.

- Hard copy mailout, by name and job title, to around 10,000 key OE automotive personnel: Europe 45%, North America 35%, Asia/Pacific 15%, Rest of World 5%.
- Full-colour interactive digital version also available online at www.electrichybridvehicletechnology.com
- Distribution is to OE vehicle design, development and production companies, relevant independent design, engineering and R&D facilities, and to principal Tier One and Tier Two suppliers.
- Additional distribution at key industry events, including Electric & Hybrid Vehicle Technology Expo, The Battery Show, EVS, eMove360°, Vehicle Electrification Expo, Advanced Automotive Battery Conference and LCV.

PUBLISHING SCHEDULE 2021:
March 2021 issue:
Copy deadline: Friday 12th February 2021
July 2021 issue:
Copy deadline: Friday 11th June 2021
November 2021 issue:
Copy deadline: Friday 15th October 2021

ADVERTISING RATES:
Double Page Spread: £6,500
Full Page Colour: £4,450
Half Page Colour: £3,100
Quarter Page Colour: £1,750

Special series discounts for booking more than one issue at the same time. Premium advertisement positions (covers etc) also available - prices upon request. Technical editorial and interview opportunities also available to advertisers on a strictly ‘first come, first served’ basis!

Banner advertising available on www.electrichybridvehicletechnology.com and also in our weekly e-newsletters - details on next page.
