As the market for electric motorbikes becomes increasingly competitive, we look at the latest developments.

Once a niche sector, new in-wheel and direct drive advancements mean this technology is finding wider applications.

After ditching ICE-only in 2022, China’s BYD is now fully focused on EVs. How will its new vehicles fare in Europe?
First published in 1995, and now sent free of charge three times a year to over 20,000* key specifiers and decision-makers throughout the global automotive industry, Electric & Hybrid Vehicle Technology International is firmly established as the world’s leading international showcase for technology and innovation in electric, hybrid and fuel-cell vehicle design, development and manufacture.

- Hard copy mailout, by name and job title, to around 10,000 key OE automotive personnel: Europe 45%, North America 35%, Asia/Pacific 15%, Rest of World 5%.
- Full-colour interactive digital version also available online at www.electrichybridvehicletechnology.com
- Distribution is to OE vehicle design, development and production companies, relevant independent design, engineering and R&D facilities, and to principal Tier One and Tier Two suppliers.
- Additional distribution at key industry events, including Electric & Hybrid Vehicle Technology Expo, The Battery Show, EVS, eMove360°, Vehicle Electrification Expo, Advanced Automotive Battery Conference and LCV.
